

KGiSL Institute of Technology

(An Autonomous Institution)

Affiliated to Anna University, Approved by AICTE, Recognized by UGC,

Accredited by NAAC & NBA (B.E-CSE, B.E-ECE, B.Tech-IT),

365, KGiSL Campus, Thudiyalur Road, Saravanampatti, Coimbatore - 641035.

END SEMESTER EXAMINATIONS-APR/MAY 2025

Regulation-2021

Programme(s)	Semester	Course Code	Course Title
COMMON TO ALL B.E&B.TECH	II	24UCS271	PROGRAMMING IN C

Time: Three Hours

Max:100 Marks

PART - A (10 x 2 = 20 Marks)

Answer All Questions		RBT Level	CO	Marks
1.	“Keywords cannot be used as Identifiers”-Justify the correctness of the statement. Keywords cannot be used as Identifiers – Because keywords are reserved words in C with predefined meanings and uses in the language syntax.	U	CO1	2
2.	Specify the use of preprocessor directive. It instructs the compiler to process certain instructions before actual compilation starts, like #include or #define.	R	CO1	2
3.	Write the value stored in variable var in the following string operations statement in C language <code>var = strcmp("Hello", "World")</code> Value of var = <code>strcmp("Hello", "World")</code> – A negative value (because "Hello" is lexicographically less than "World").	U	CO2	2
4.	Give an example for initialization of a 2D array with a set of values. <code>int arr[2][2] = {{1, 2}, {3, 4}};</code>	U	CO2	2
5.	Define the term recursion in C Language. It is a function calling itself directly or indirectly to solve a problem.	R	CO3	2
6.	List out the differences between user defined functions and built-in functions. User-defined functions are written by programmers, while built-in functions are predefined in C libraries.	U	CO3	2
7.	Define self-referential structure. A structure that includes a pointer to a structure of the same type.	R	CO4	2
8.	Write the key differences between structure and union. In structure, all members have separate memory; in union, all members share the same memory location.	U	CO4	2
9.	Mention the impact if 'fclose()' function is avoided in a file handling C program. It may lead to memory leaks, data not being saved properly, or file corruption.	U	CO5	2
10.	List the various modes of accessing a file through C. "r", "w", "a", "r+", "w+", "a+", "rb", "wb", "ab", etc.	R	CO5	2
